What does the course cover ?

The training course duration is of 4 days and

- Takes you through the BCM Lifecycle step by step, which sits at the heart of good BC practice
- Provides practical insights into all aspects pertaining to the development, implementation and management of a BCM program within an organization through the use of case studies and real-life examples
- Covers the six Professional Practices (PP) at Management and Technical Level that make up the BCM Lifecycle.

Passing the examination provides you with the possibility of applying a statutory grade of the BCI.

The subject matter expert addresses the following modules :

Module 1 - Policy and Program Management (PP1)

- Policy and Programme Management PP that is at the start of the BCM Lifecycle. This stage of the Lifecycle defines the organizational policy relating to BC and how that policy will be implemented, controlled and validated through a BCM programme.

Module 2 - Embedding Business Continuity (PP2)

- Embedding Business Continuity, which is the PP that continually seeks to integrate BC into day-to-day business activities and organizational culture.

Module 3 - Analysis (PP3)

- Analysis stage of the BCM lifecycle that reviews and assesses an organization in terms of what its objectives are, how it functions and the constraints of the environment in which it operates.

Module 4 - Design (PP4)

- Design stage of the BCM Lifecycle that identifies and selects appropriate strategies and tactics to determine how continuity and recovery from disruption will be achieved.

Module 5 - Implementation (PP5)

- Implementation stage of the BCM lifecycle that executes the agreed strategies and tactics through the process of developing the BCP.

Module 6 - Validation (PP6)

- Validation stage of the BCM lifecycle that confirms that the BCM Program meets the objectives set in the BC Policy and that the organization's BCP is fit for purpose.
